

mesh™ Automated Event & Log File Management

Regulations & Compliance Mandates

Automated Event Monitoring & Forwarding

Keeping track of what is happening on the devices in your network can be a daunting challenge. With ever increasing system complexity, user access, and security threats, not to mention business compliance law and internal company policies, having a system that manages, collates, delivers and reports this data is critical to business success.

Even when you gather the information from the many devices in your network, how will the data be managed? If a network tool is to perform the work, how will *it* be managed? Will it fit with my existing systems?

Honeycomb's automated Event & Log File Management system delivers the information you need, when and where you need it *automatically*, so you can concentrate on the business at hand – enjoying life.

Windows Event Monitoring

Ensuring security and compliance in your network environment is more than simply gathering event data from one place – data collection needs to be performed and managed for a vast variety of systems and applications, and across all your devices.

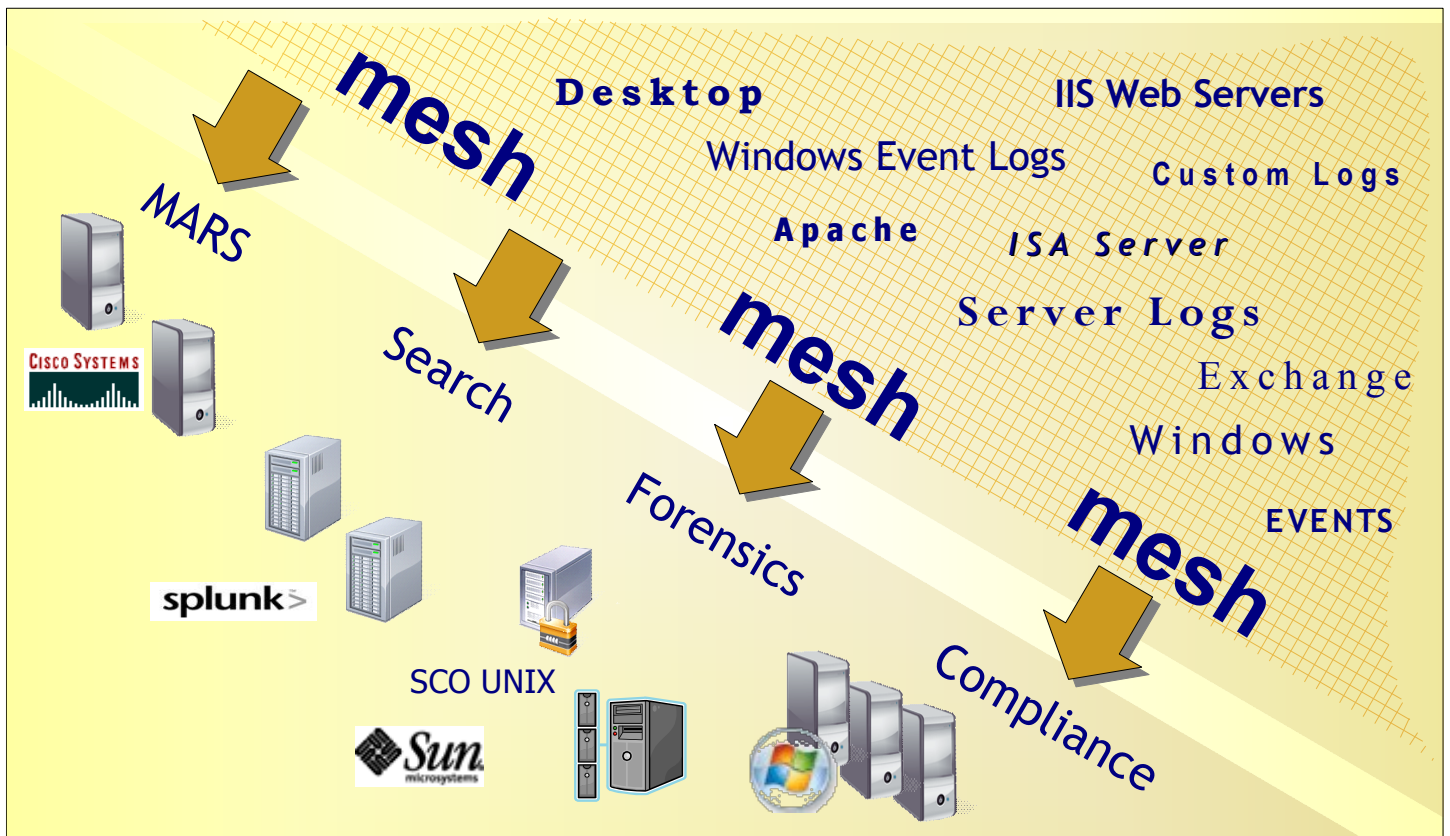

Having a simple, automated system that handles these tasks with the minimum of effort and resources is critical to ensuring your security infrastructure remains healthy.

Honeycomb's mesh™ system includes built-in knowledge of well-known systems such as:

- ▶ **Windows Event Logs**
- ▶ **Windows Security Audit Policy**
- ▶ **Directory Services/Active Directory**
- ▶ **IIS & Apache Web Servers**
- ▶ **..and many others..**

Even custom event logs and files from your bespoke applications can be automatically monitored and configured for change detection!

Honeycomb also provides and maintains configuration and rule sets for popular 3rd party analysis applications such as **Cisco MARS™** and **splunk>™**.

Honeycomb's mesh™ Event & Log File Management – Key Benefits

- ▶ **Central management of data collection from many different sources**
- ▶ **Automatic detection and update when source environments change**
- ▶ **Easily and automatically maintain compliance with legislation and company policy**
- ▶ **Only delta changes sent across the network**
- ▶ **Full integration with 3rd party security analysis applications**
- ▶ **Integrated knowledgebase for industry standard data sources**
